

TraceFlow AgentPerformance Report

Generated on 5/31/2025, 11:27:19 PM

Summary

total Agents: 272
total Visits: 0
total Stubs Collected: 0
total Receipt Books Assigned: 0
average Performance Score: 0.0

AI-Generated Summary

Analysis of Agent Performance Data:

Key Metrics:

- Visits Received: The number of visits each agent has received (currently 0 for all agents)
- Completed Visits: The number of visits each agent has successfully completed (currently 0 for all agents)
- Stubs Collected: Not found in the provided data
- Receipt Books Assigned: Number of receipt books assigned to each agent (currently 0 for all agents)
- Region: The geographical region where each agent operates
- Supervisor: Name of the supervisor assigned to each agent
- Performance Score: Not found in the provided data, but it could be an evaluation metric for each agent's performance

Trends and Patterns:

- All agents have zero visits received and completed. This suggests that no interactions or transactions have been initiated yet.
- Most agents do not have their location updated (indicated by 'locationUpdated': false), which could imply that they are yet to log in from their specific locations.

Implications and Recommendations:

- Prioritize onboarding and training for the new agents to facilitate their first interactions. This will help in setting up a baseline for performance evaluation.
- Encourage regular login and location updates to ensure accurate data collection and geographical distribution of agents.

Anomalies and Outliers:

- There are a few test users (identified by names like 'test test', 'Anonyme Test0', etc.) with 'locationUpdated': true, which might be due to erroneous or premature activation. It is recommended to monitor these accounts closely.
