

TraceFlow UserActivity Report

Generated on 5/31/2025, 11:25:04 PM

Summary

total Activities: 73
unique Users: 2
suspicious Activities: 73
last Activity: 2025-05-29T22:31:24.526Z

AI-Generated Summary

Analysis of UserActivity Data:

Key Metrics:

- 'ipAddress' reveals the source IP of user activity. In this dataset, we observe various addresses such as 192.168.1.13 and N/A.
- 'status' indicates the status of each event, with values like 400 (Bad Request) or 'N/A'.

Trends and Patterns:

- There appears to be a high number of auth events with a status of 400, suggesting potential issues with user authentication.
- A significant number of reports are associated with IP address 192.168.1.13, possibly indicating an issue localized at that source.

Implications and Recommendations:

- Improve user authentication processes to reduce the frequency of Bad Request statuses (400). This may involve verifying input data or enhancing security measures.
- Investigate the IP address 192.168.1.13 further as it seems to be a recurring source of issues.

Anomalies and Outliers:

- There are no clearly defined outliers in this dataset, but the high number of auth events with status 400 warrants closer investigation.

Details
